

bio SPOT®

Did you know?

Only about **5%** of the flea population are mature adults. The other **95%** are in the **Egg, Larva, or Pupa** stage of development.

- Rapid producers of their offspring, eager and hungry adult fleas can quickly invade your unprotected pet.
- Flea eggs account for around 50% of a domestic flea infestation. Just one adult female flea can lay up to 50 eggs per day.
- Eggs laid on your dog by female fleas can easily spread throughout your home and onto your carpeting, your furniture and your other pets.

Bio Spot® Spot On® Flea & Tick Control for Dogs helps keep your pet free and clear from fleas and ticks all year round. Formulated with an Insect Growth Regulator (IGR), Bio Spot® Spot On® Flea & Tick Control for Dogs kills menacing fleas, ticks and flea eggs for up to 30 days!

Protect your dog. Any time. Any place.
